

Calculator Usage Guidelines for CMA Professional Programme 2018 – 2022

Following calculator usage guidelines are applicable for the CMA Professional Programme 2018 – 2022.

Types of calculators allowed

- Students are allowed to use scientific, non-programmable calculators for subjects in the CMA Professional Programme 2018 – 2022 where the use of a calculator is applicable including the Integrative Case Study.
- For the Foundation Level on-line examinations, a computer-based scientific calculator will be available at the examination.

Types of calculators not allowed

- Any programmable calculators which are capable of storing text or alphanumeric data.
- Any programmable calculators which are capable of performing operations such as differentiation, integration, algebraic expressions, solutions to a system of equations, etc.
- Calculators with external communication features or internet connectivity.
- Calculators on mobile phones.

Pre-approved list of calculators

Casio fx models except graphing / graphic models.

E.g.

- fx – 100 MS
- fx – 991 ES PLUS
- fx – 991 MS
- fx – 82 MS
- fx – 82 ES PLUS

Important note to students

Students are responsible for getting acquainted with the usage of a permitted type of a calculator and ensuring the performance of the calculator on the day of the examination.

E.g. performance of the battery, solar power, etc.
